

The Summer Space 2017

WEEK 07.
7th to 11th of August

DAY 01 The day started with a check in questions to stay energised for the new week. Later we followed on the group work. After lunch, we had a visit by **Saeid Torkabadi**. He told us about his project **YACA (Youth As Change Agents)** and encouraged the high school students to participate in the program. This week we plan to have more workshops, therefore we produced promotional material and put up posters around **Bergsjön** to attract people to the event.

DAY 02 As usual we had the check in question followed by group work and after lunch the students interacted with **Patrick** and **Asal** from **Angered Gymnasium**. The students talked about their experiences from **The (Summer) Space** and if they were learning and improving their skills. And the day ended with a checkout question.

DAY 03 This was an important day for the **Fire Safety and Security** team and the Job creation team as both had workshops in **Bergsjön** and were supported by the rest. Awareness workshop at **Rymdtorget** with the support from **Kortedala Fire Station**. In its turn, Job creation team had a **CV writing workshop** in **Bergsjön Library**.

DAY 04 We summarise the workshops experience and think on how can we improve and what are the ways to involve local organisations and communities to run it with us. Today was a special day for Emilie as she was celebrating her 18th birthday and **Simona** made a cake.

DAY 05 Today we work hard to finish our project summaries. Next week is the last one and we need to prepare for public presentations and print project materials. We work in project groups and follow the summary structure created by **Aleks** and **Natalie**.
